PROFESSIONAL SUMMARY

Software development student with experience creating interactive C++ console applications. Skilled in object-oriented programming, debugging, input validation, and Git version control. Developed Camp Woodwreath, a branching supernatural horror game featuring character statistics, collectible lore, and multiple endings. Interested in pursuing opportunities in software and game development.

TECHNICAL SKILLS

Programming Languages: C++, HTML, CSS
Software & Tools: Visual Studio, Git, GitHub, Microsoft Office
Technical Concepts: Object-Oriented Programming, Classes & Objects, Functions, Loops, Vectors, Input Validation, Debugging, Conditional Logic, Branching Storylines, Version Control, Pull Requests

TECHNICAL EXPERIENCE

Camp Woodwreath — C++ Console Game Developer

- Developed an interactive supernatural horror game using C++20 and Visual Studio.
- Implemented branching dialogue, six character statistics, collectible lore, and three possible endings.
- Created conditional choices, player status menus, and input validation to improve gameplay.
- Used Git and GitHub to manage development branches, commits, pull requests, and project documentation.
- Debugged gameplay logic and tested different story paths to identify and resolve issues.

PROJECTS

Camp Woodwreath — Interactive Horror Game

Developed a branching supernatural horror game in C++20 where players investigate mysterious disappearances at a secluded summer camp. Implemented character statistics, collectible lore,

conditional dialogue, and multiple endings. Designed gameplay systems that reward exploration and influence the story based on player decisions.

Technologies: C++20, Visual Studio, Git, GitHub

EDUCATION

Full Sail University

Bachelor of Science in Game Development
Expected Graduation: June 2028

Relevant Coursework:
- Programming Fundamentals
- Object-Oriented Programming
- Software Development
- Version Control
